SIMATS ENGINEERING

Lab Programs

COURSE CODE: CSA0705 **COURSE NAME: Computer Networks**

EXPERIMENT 2: IMPLEMENTATION OF STAR TOPOLOGY USING PACKET TRACER

Aim:

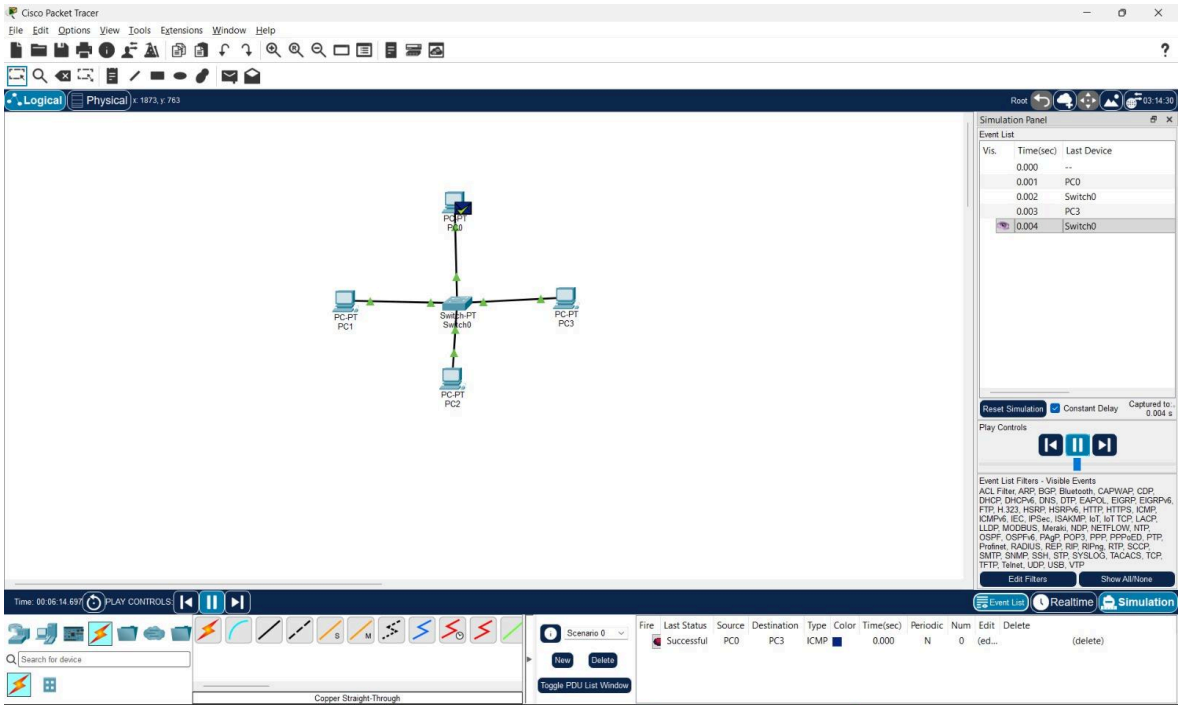

To implement a star topology using Cisco Packet Tracer and transmit data between the connected devices.

Software Used: Cisco Packet Tracer.

Algorithm / Procedure:

- Open Cisco Packet Tracer.
- Place one switch and four PCs in the workspace.
- Connect all four PCs to the central switch using copper straight-through cables.
- Configure unique IP addresses and subnet masks for all PCs in the same network.
- Switch to Simulation Mode and select the Add Simple PDU tool.
- Click PC0 as the source and PC3 as the destination to test connectivity.
- Observe the ICMP packets and verify the PDU status.

Execution Screenshot:

Result:

Thus, the star topology was successfully implemented using Cisco Packet Tracer, and data transmission between the connected devices was verified successfully.
