EXPERIMENT 6: IMPLEMENTATION OF TREE TOPOLOGY USING PACKET TRACER

Aim:

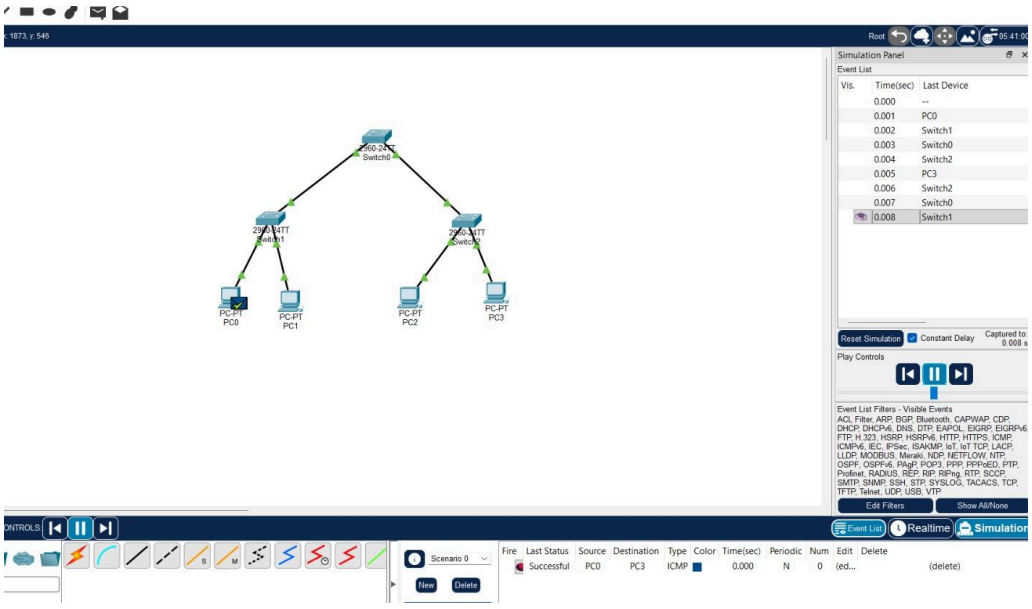

To implement a tree topology using Cisco Packet Tracer and transmit data between the connected devices.

Software Used: Cisco Packet Tracer.

Algorithm / Procedure:

- Open Cisco Packet Tracer.
- Place three switches and four PCs in the workspace.
- Connect the switches in a hierarchical structure to form a tree topology.
- Connect the PCs to the lower-level switches using copper straight-through cables.
- Configure unique IP addresses and subnet masks for all PCs in the same network.
- Use the Add Simple PDU tool to send an ICMP packet from PC0 to PC3.
- Verify the connectivity by checking the PDU status.

Execution Screenshot:

Result:

Thus, the tree topology was implemented using Cisco Packet Tracer, and data transmission between the connected devices was verified successfully.
